With the newly developed plaster compensation frame, even accessories in boxes that are installed too low can be installed flush with the wall and in compliance with standards. Also ideal for renovations. The plaster compensation frame is stepless adjustable and can therefore, e.g. bridge retrofitted wall plaster or tiled walls professionally.

- To compensate for boxes that are positioned too low
- Continuously adjustable from 10 - 35 mm
- Installation accessories can be installed directly with the compensation frame or retrofitted
- Including screws 40 mm, Pozidriv drive
