

Abutment and support elements

Abutment for adhesive foil

- for support element Ø 20 mm
- Fixing to formwork using 1219-00 adhesive foil

Article no:	1205-02
EAN:	4013456351103
Dispatch	250

The on-site mixed concrete programme offers special abutments and support elements for the installation of opposing one-gang boxes or the installation of one-gang boxes and junction casings on the opposite side of the formwork. For this purpose, there are holders in the back of the item that provide the support elements with a anti-rotation hold. The curved base of the box facing outwards forms an integrated spring travel, which is used to compensate for component-related tolerances when setting the opposing formwork by compressing it.

- Two abutments for fixing to the working formwork using expanding dowels, nails, screws or adhesive foil
- No blocking of conduit entries thanks to the anti-rotation support element attachments in the back of the one-gang boxes and junction casings
- The integrated spring travel ensures a secure hold between the working and opposing formwork and compensates for construction tolerances
- Thanks to their star-shaped contour, the support elements ensure that the concrete flows around the entire surface
