A new one-gang box is now available in the O-range® programme for walls with thin boarding or small cavity: thanks to its installation depth of just 35 mm and the zero clamping technology, which ensures a permanently firm hold, it is particularly suitable for walls with little space or thin wall thickness.

- · With zero tension technology for thin boarding
- · Low installation depth of 35 mm
- · Cable entries with integrated cable retention
- · Device screws with flat countersunk head
- · For cables up to Ø 11.5 mm
