- matching plug-in cover for Art. No. 9498-77 New Look one Art. No. 9919.10
- For device screws Ø 3 mm
- Max. tightening torque 0.5 Nm

Article no:	9498-77
EAN:	4013456536425
Length	83 mm
Width	83 mm
Depth	50 mm
Cut hole Ø	83 mm
Combination	1x1
Packaging inner/dispatch	10/100

Fire-protection boxes are given the same period of fire resistance in fire-protection walls in spite of fitted electrical installations and ensure secure, smokeproof room separation. In the event of a fire, an integrated fire retardant quickly and reliably closes the installation opening and prevents flames and flue gases from escaping. This ensures that lives are saved and material goods are efficiently protected.

- For fire protection walls
- Retrofitting is possible
- For a directly opposing installation
- Can be used with fire-protection cover as a junction box

does not match with the following types:
